HR ATTRITION ANALYSIS - ASK YOUR DATA

Try Asking :
"Show count of Attrition by Department" or
"Which Job Role has highest Attrition" or
"What is the average Job Satisfaction by Attrition" or
"Show count of Attrition by Age Group" or
"Show count of Attrition by Gender"

"Show count of attritin by Gender

Showing results for *Show count of **attrition** by Gender*

HR ATTRITION KEY FINDINGS

KEY INSIGHTS :

Attrition is concentrated among younger employees in frontline roles, particularly in R&D and Sales. Males are more likely to leave than females, and overtime plus low promotion opportunities are strongly linked to turnover. Employees who left also earned less on average, suggesting that workload balance, career growth, and competitive pay are critical areas for HR to address.

DATA STORY :

- Data of 1470 rows.
- **Tools Used :** Power BI , DAX
- **Charts used :** Slicer , KPI , Clustered Bar Chart , Clustered Column Chart , Stacked Bar Chart , Donut Chart .
