GPA by Sleep Hours

Result by Stress_Level

GPA by Stress Level

Stress_Level
- ☐ High
- ☐ Low
- ☐ Moderate

Performance Level
- ☐ Average
- ☐ Good
- ☐ Needs Support
- ☐ Outstanding

Insights:

- Key Finding : Students with <6 hours sleep have 40% lower GPA.
- Stress Impact : High Stress group avg GPA = 6.2 vs Low Stress = 8.1.
- Study Sweet Spot : 7-8 hours study = Highest pass rate (2000 students).
- Recommendation : Increase sleep to 7.5 to boost performance.

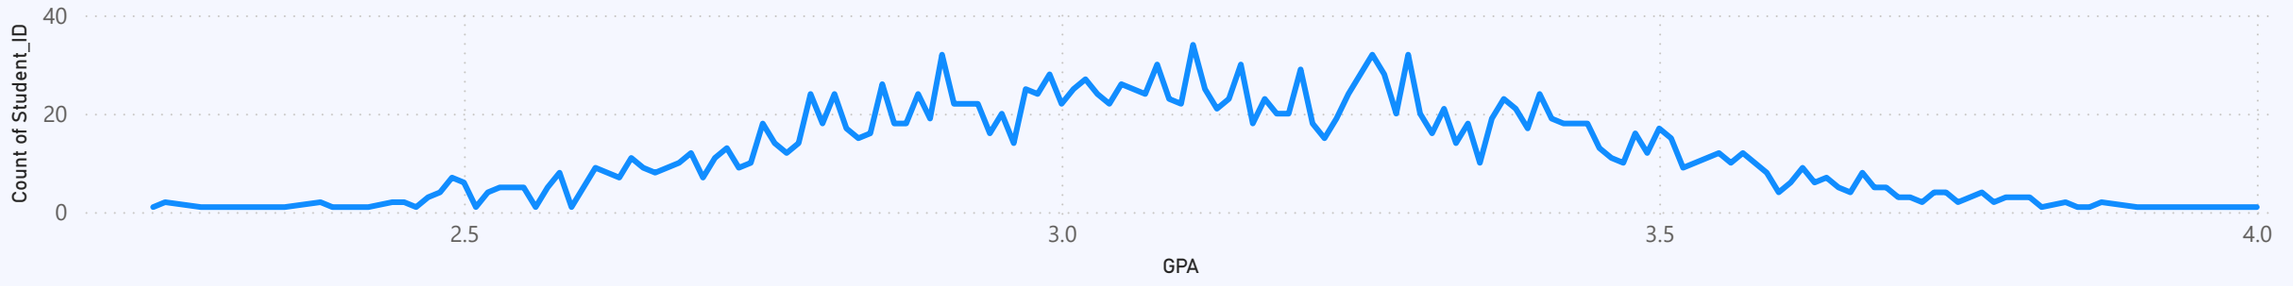

STUDENT LIFESTYLE - ASK YOUR DATA

Dashboard | Ask Your Data | Key Findings

Try Asking :

"Show count of students by Performance Level" or
"What is the average Sleep Hours by Gender" or
"Show average Study Hours By stress level " or
"Is there correlation between Sleep Hours and GPA" or
"Which stress level has highest students" or
"What is total students by GPA?"

What is total students by GPA

STUDENT LIFESTYLE ANALYSIS KEY FINDINGS

Dashboard | Ask Your Data | Key Findings

Data Story :

- Data of 2000 students.
- **Columns :** Study_Hours_Per_Day , Extracurricular_Hours_Per_Day , Sleep_Hours_Per_Day , Social_Hours_Per_Day , Physical_Activity_Hours_Per_Day , GPA , Stress_Level.
- **Tools Used :** Power Bi , Dax .
- **Charts used :** Pie chart , Stacked Column Chart , Clustered Column Chart , Card , Text Box , Slicer.

Recommendation :

- Students with 7+ hours have higher GPA.
- More than 4 hours screen time = Higher stress
